EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Independent claims 19, 23, and 31 to 34 are allowable because the prior art of record does not disclose or reasonably suggest recognizing spoken instructions at least associated with a VPN number for a stored VPN address, so that the VPN address is translated from the spoken instructions. *Griswold et al.* is the closest prior art of record, disclosing the basic concept of translating spoken words into a web address, and mentions an application to a virtual private network. See ¶[0046] – ¶[0047] and ¶[0078] – ¶[0085]. However, *Griswold et al.* does not disclose VPN addresses or VPN numbers, or a switch, although a switch is well known in cellular telephone architectures. *Curry et al.* discloses an intelligent network with switches 110 that extracts an address or number from a query for translation or look-up. (Column 18, Lines 54 to 63) Still, *Curry et al.* doesn't disclose VPN numbers or VPN addresses from recognized spoken instructions. Similarly, *Lim et al.* discloses a voice-recognition-based method for calling a party at one of a number of locations, but is not directed to VPN numbers or VPN addresses. Applicant's Specification, Page 16, Line 28 to Page 17, Line 11, states that the invention is applicable to a VPN, where a user is trying to reach a person in the same company. The prior art of record does not disclose or reasonably suggest receiving a speech instruction associated with a VPN number, recognizing an additional spoken input indicating that a VPN address is stored, translating the speech instruction into a VPN address, and transferring the VPN address to a switch.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
